

Difficulty Conceiving?

The Shropshire and Mid-Wales Fertility Centre is an NHS Assisted Conception Centre that has been operating from the Royal Shrewsbury Hospital since 1991. Our Centre offers the latest in assisted conception technology to both NHS and Private patients from Shropshire, Telford & Wrekin and Mid-Wales and surrounding counties.

We pride ourselves on quality of care, high success rates and the 'personal touch' for our patients.

When to Seek Help

When you have been trying to conceive for over 12 months without success you should seek help by visiting your GP. Your doctor will then perform some preliminary blood tests and possibly a semen analysis.

When visiting your GP, please ask to be referred to the Shropshire & Mid-Wales Fertility Centre at the Royal Shrewsbury Hospital, following referral you can be seen at either the Royal Shrewsbury Hospital or Princess Royal Hospital.

We hope you'll find our website both easy to use and informative:
