

Appendix 2:

Organs for Transplant CQUIN Reporting Template for Quarter One April – June 2011

Trust: SHREWSBURY AND TELFORD HOSPITALS NHS TRUST

For Quarter one monitoring please provide the following data for the 6 month period OCTOBER 2010 – MARCH 2011

Sub – indicator	Data Oct 2010 – March 2011 from in-house data recording	Comments (please comment on any differences between the NHSBT data report and in-house data)
N1: Neurological Testing	7 potential Brain stem dead patients. 3 patients not tested. 57% Brain stem death testing rate.	
N2: Notification to Specialist Nurse for Organ Donation when there is a plan to confirm death by neurological testing	7 Potential brain stem dead patients. 1 Patient not referred. 86% Referral rate.	
N3: Notification of Specialist Nurse for Organ Donation when a decision has to be made by a consultant to withdraw active treatment (for potential donation after cardiac death)	4 patients referred for potential DCD donation. 1 patient not referred or discussed. 75% Referral rate.	17 patients had withdrawal of treatment, only 5 of which met the trigger for referral for SaTH NHSBT records show 29% referral rate.
N4: Approach to Family	3 families approached. 1 not as declined donation before approach. 1 not medically suitable, so not approached. 60% Approach rate.	4 patients did not meet the trigger for referral so not approached or referred to the SN-OD. NHSBT records show 33% approach rate, as trigger for referral not counted in potential donor audit.

N5: Trusts Donation Activity	6 monthly report sent to the trust board in October 2010.	
------------------------------	---	--

1. ***Progress so far for 2011-12:**

There have been 2 families not approached for potential DCD donation in the Emergency Departments, one patient at Royal Shrewsbury Hospital and one patient at Princess Royal Hospital. The Current DCD referral rate is 71% with an approach rate of 83% to families regarding possible DCD donation. The trust has a current 100% Brain stem death testing and referral rate for DBD donation (3 patients tested and referred. 1 family refusal and 2 coroner refusals)

2. **Local referral criteria:**

Currently any patient with a plan to carry out brain stem death tests or a planned withdrawal of treatment and a diagnosis of a catastrophic neurological injury should be discussed with the relevant consultant in charge of the patient and the Specialist Nurse for Organ Donation.

***Data correct as of 27 June 2011.**
