

# The Shrewsbury and Telford Hospital NHS Trust

## Month 6 Performance Summary

- Stroke performance (88.8% ytd) remains above the national target of 80% of time spent on specialist stroke ward.
- Delayed transfers of care reduced to 2% in September from 3.3% in August against a target of less than 3.5%. YTD performance remains above the less than 3% target at 4.26%.
- In September there were **zero** MRSA bacteraemia, **7** C Diff cases of which **3** are apportioned to SaTH. The Trust is now below the ytd trajectory with regard to C difficile with 24 cases vs trajectory of 27 cases.
- A&E Performance in the month against the 95% target was 93.78% with a ytd figure of 94.45%.
- As anticipated Admitted and Non Admitted RTT performance dropped in September as a result of 'clearing the backlog'. Admitted performance was 65.41% and Non Admitted was 81.28% compared to the respective 90% and 95% targets.
- Initial unvalidated data shows cancer failed 3 of the specific targets in September: 31 day diagnosis to treatment for all cancers 95.17% against target of 96%, 31 day second or subsequent treatment – surgery 86.96% against target of 94% and 62 day referral to treatment from screening 73.91% against target of 90%.
- Year to date performance for Cancer including the unvalidated September performance shows 62 days urgent GP referral to treatment of all cancers and 62 day referral to treatment from screening both remain below the target of 90% and 85% respectively.
