

Bowel cancer screening can **save lives.**

At the moment in some areas of the UK only **a third** of those who receive a test complete it.

Bowel cancer is treatable and curable especially if diagnosed early.
Nearly everyone diagnosed at the earliest stage will survive bowel cancer.

Taking part in screening is the best way to get **diagnosed early.**

If you are **over 60** (or over 50 in Scotland), **take the test** when you receive it in the post.

Take the test!

If you are **younger**, tell the people over 60 (or over 50 in Scotland) in your life, to **take the test.**
