

Caution ~ Battery Hazard

Hearing aid batteries should be used carefully

If you think a child has:

Swallowed a battery ~

Then you are advised to take the child for an X-RAY at the **casualty department** of the nearest hospital.

Pushed a battery into the nose or ear~

Then you are advised to take the child to the **doctor** or to the **casualty department** of the nearest hospital for medical advice.

If you have any concerns please contact: **NHS 111**

Guidelines for safe battery use

- ✓ Batteries must be stored carefully
- ✓ Keep batteries away from young children
- ✓ Keep new batteries in their original packet
- ✗ Never store batteries loose in any container

Any concerns about your appointment? Contact the Patient advice liaison service (PALS):
