Actions we take when the actual number of staff on duty does not match the planned

Ensuring we have the right number of staff to provide high quality, safe care to our patients is our key priority at all times. Ward staff are encouraged to raise and report any concerns about staffing on their shift to the senior nursing and clinical site management teams. We hold regular bed meetings throughout the day and undertake a Site Safety Report at least twice a day to identify any staff shortages. This ensures we can fully assess any potential impact of a staff shortage on patient care and allows us to take responsive action to address this, which may include redeploying staff from one area to another.

If you have any questions about the staffing on our ward, please speak to the person in charge
